Black Hills Energy Gas 2021-2023 DSM Plan

Black Hills Energy (Gas DSM) recently filed their 2021-2023 DSM Plan. In this plan, BHE has proposed to eliminate the on-site residential assessment and direct install program. This change could affect energy analysts, insulation, and air sealing contractors, among others. EEBC invites you to submit your comments of concern related to the value of in-home audits directly to the PUC. To assist you in writing and organizing your comments, download Energy Smart Colorado's Basic Guidelines | Summary Assessment Detail Document.

Colorado Regulatory Commission | Public Utility Commission [PUC] [SCREEN SHOTS - PAGES to FILL OUT]
MEMBER ACTIONS NEEDED BY FRIDAY, JULY 30th, END-OF-DAY

- Submit your public comment(s) directly to the Colorado Regulatory Commission | Public Utility Commission. Click this link. **Takes only 5 minutes!**
- Please include critical benefits of the energy audit/home performance program and why the program needs to be retained.
- **REVIEW COMMENTS** submitted to date. | [https://www.dora.state.co.us/pls/efi/](https://www.dora.state.co.us/pls/efi/)
  - To find the comments already submitted, look up the proceeding number: 20A-0190G (for Black Hills Gas)
  - Then search for documents "Comment".
- Please contact Kasey Provorse, Executive Director, Energy Smart Colorado, 970-485-2367, Kasey@energysmartcolorado.com for assistance and/or questions.

NEXT POLICY ACTION COMMITTEE MEETING | July 30, 2020 @ 3:30 pm – 4:30 pm
