

Xcel Energy Dual Fuel Cold Climate Heat Pump Study Contractor Agreement

In order to offer incentives associated with the Dual Fuel Cold Climate Heat Pump Study and to receive trade incentives, I agree to:

- Follow all terms and conditions of the Residential Heating and Cooling program, provided on the rebate application.
- Ensure the customer signs the Terms and Conditions for the study.
- Consult with the Measurement and Verification Contractor and make required modifications regarding proper sizing and installation of equipment and selection of the switchover temperature.
- Assist the Measurement and Verification Contractor on completing the commissioning checklist and functional performance testing of the installed equipment.
- Leave all monitoring equipment installed and operational.

Xcel Energy will provide the following trade incentives:

- A minimum of a \$200 incentive for each customer participating in the study.
- An additional \$200 if the contractor is present for installation of the monitoring equipment, to assist as needed.
- An additional \$500 if the contractor provides a licensed electrician to install the monitoring equipment.
- Up to a maximum of a \$900 incentive for each customer participating in the study.
